Interior Protection System

THE BEST VALUE FOR INTERIOR PROTECTION ON THE MARKET

The Auto Butler Fabrigard Protector

Auto Butler's Fabrigard helps keep your vehicle's upholstery looking like new, without changing the look or feel of the fabric. One professional application of our commercial grade protector creates a powerful barrier that repels liquids and soils for years. Even when a spill occurs, the Fabrigard barrier prevents it from penetrating into the fibers. Liquids such as coffee, soft drinks and other consumable spills can be easily cleaned up. Fabrigard also makes it difficult for dirt particles to cling to fibers, making routine vacuuming easier and more effective.

The Auto Butler Leathergard Protector

A fine leather interior represents a major investment worth protecting. Leather requires regular conditioning to maintain its original look and feel. Without regular conditioning, leather will lose its natural lubricants, become brittle and unyielding, eventually cracking irreparably. The Auto Butler Leather Protection System is a conscientious program of care from the onset that includes re-treatment of your vehicle's interior leather components every six months for the life of your program. This system will keep your leather soft and supple, preventing premature failure.

Auto Butler®

GIVE YOUR VEHICLE'S INTERIOR THE CARE AND PROTECTION IT DESERVES!

Protect and Maximize the resale value of your new vehicle with Auto Butler
