Vehicle Surface with Auto Butler Protection

Programs Available (Ask for Details)

The Auto Butler program is unique 2-step process:

Step 1: Using the revolutionary Auto Butler Polisher, your paint is first polished to enhance the shine while preparing the surface for our ceramic protective coating.

Step 2: Our exclusive ceramic infused paint sealant is machine applied, molecularly bonding the ceramics to your paint, effectively shielding it from the elements.

Special 1-Time Application

We will wash your vehicle, clean the windows (inside and out), remove the bugs, vacuum the interior and apply Auto Butler's Premier Paint Protection II for only...

\$149.95

The Auto Butler program is a convenient, cost-efficient method to protect your vehicle's painted surface and keep your vehicle looking showroom new.
